

Caverion provides building solutions to new buildings at the YIT residential complex in St. Petersburg, Russia

Caverion Corporation Press release October 2, 2015 at 10 a.m. EEST

Caverion provides building solutions to new buildings at the YIT residential complex in St. Petersburg, Russia

Caverion has signed a contract with YIT St. Petersburg for installation of building solutions to the YIT residential complex INKERI in the town of Pushkin, St. Petersburg. Contract covers nine newly constructed buildings. Caverion is responsible of project management and project execution. The technical disciplines included in the contract are heating and sanitation, ventilation and air conditioning, security and safety. The value of the contract will not be disclosed.

The new residential complex will have nine five-floor buildings with a total surface area of 48,700 m² and 598 flats. The installation work of the building solutions is expected to be completed by the end of March of 2016.

"This contract continues our good and long cooperation with YIT in Russia. We want to contribute on creating modern homes with high quality solutions," says **Niclas Sacklén**, Group Senior Vice President and CEO of Division Eastern Europe of Caverion.
